Bespak springs into action for local science students

As part of its continued support for science-related education in the community, King's Lynn based Bespak plc, a leader in medical devices for inhaled drug delivery and anaesthesia, has contributed to new protective clothing for the science department at Springwood High School.

Following a refurbishment of the school's science laboratory, sixth-form student April Bloom approached Bespak to donate new lab coats and protective eyewear for the school's AS and A Level science students.

Bespak, together with two of its suppliers Wenaas, in Great Yarmouth, and Fenland Laundries Ltd, in Skegness, contributed 20 white lab coats and protective eye goggles.

"Our science students were excited at the prospect of studying in the newly-refurbished science lab, but the thought of wearing the old lab coats and protective eyewear was not appealing. At Springwood, we were aware of Bespak, not least because they often visit our school to give talks about the company and its work, and it seemed natural to go to them with our appeal," said Peter Hopkins, Head Master of Springwood High School.

Chris Halling, Head of Corporate Communications at Bespak, said: "Bespak is committed to supporting science education in the local community and, whenever possible, we are happy to help contribute to fundraising activity that will benefit learning."
