

BESPAK 3 YEAR HIGHER APPRENTICESHIP RESEARCH & DEVELOPMENT

Do you have a Level 3 Engineering Qualification and a minimum of five GCSEs (grade A* - C), including Maths, English and Science?

Are you highly motivated, flexible, and a good team player with a commitment to learning and an interest in engineering and innovation?

This is practical hands-on learning, combined with office based training.

Candidates for this role should be computer literate and technically minded.

At the end of the 3 year apprenticeship programme the candidate will have:

- Experience of front end medical device development activities
- Understanding and use of Computer-Aided Design (CAD) software (SolidWorks)
- Use of Bepak's in-house rapid prototyping facilities
- Ability to plan and carry out medical device testing
- Understanding of medical device regulatory requirements

The programme includes off site training at a recognised training provider and on the job training at Bepak King's Lynn and Cambridge, working alongside experienced and supportive colleagues. As well as earning a competitive remuneration package you will also gain recognised Engineering qualifications.
